SAUBHIK DUTTA

Dhanbad, Jharkhand, India

Email: saubhikdutta.ai@gmail.com

Phone: +91 9876543210

GitHub: github.com/saubhikdutta

LinkedIn: linkedin.com/in/saubhikdutta

PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science Engineering student specializing in Data Science and Artificial Intelligence with hands-on experience in machine learning, NLP, backend development, and AI-powered web applications. Skilled in Python, Scikit-learn, TensorFlow, Flask, FastAPI, MongoDB, SQL, and data visualization. Passionate about building scalable AI products and solving real-world problems using data-driven approaches.

TECHNICAL SKILLS

Programming Languages:

Python, Java, C, C++

Data Science & Machine Learning:

Machine Learning, Deep Learning, NLP, Scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib

Backend Development:

Node.js, Express.js, Flask, FastAPI, REST APIs

Database:

MongoDB, MySQL, SQL

Tools & Platforms:

Git, GitHub, VS Code, Postman

Core Concepts:

Data Structures and Algorithms, OOPs, DBMS, Operating Systems

EDUCATION

Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar

Bachelor of Technology in Computer Science Engineering (Data Science)

Expected Graduation: 2028

CGPA: 8.5/10

PROJECTS

AI Resume Analyzer and ATS Optimization Platform

Technologies: React.js, Node.js, Express.js, MongoDB, Python, NLP

Developed a full-stack AI-powered resume analyzer platform capable of parsing resumes and evaluating ATS compatibility

Implemented NLP-based keyword extraction and semantic matching algorithms to compare resumes with job descriptions

Built ATS scoring engine achieving accurate keyword relevance and skills analysis

Integrated MongoDB database for resume storage and analytics tracking

Developed secure REST APIs for authentication and resume processing

Improved resume analysis efficiency by 40% using optimized backend processing

Machine Learning House Price Prediction System

Technologies: Python, Scikit-learn, Pandas, NumPy

Built regression-based machine learning model to predict housing prices using

structured datasets

Performed feature engineering, data preprocessing, and model evaluation

Achieved 92% prediction accuracy using Random Forest Regressor

Visualized trends and correlations using Matplotlib

AI Chatbot using NLP

Technologies: Python, TensorFlow, NLP

Developed NLP-based chatbot capable of answering user queries with intent classification

Used TensorFlow for deep learning model training

Implemented tokenization and text preprocessing techniques

Improved chatbot response accuracy through dataset optimization

EXPERIENCE

Data Science Intern — Virtual Internship

Duration: Jan 2026 – Mar 2026

engineered data preprocessing and machine learning workflows

Analyzed datasets using Pandas and NumPy

Created visual dashboards and reports for business insights

Collaborated with team using GitHub version control

CERTIFICATIONS

Machine Learning with Python

Data Science Fundamentals

Python for Data Analysis

Introduction to Deep Learning

ACHIEVEMENTS

Solved 200+ coding problems across coding platforms

Built multiple AI and machine learning projects

Active contributor to GitHub projects and collaborative development

LANGUAGES

English

Hindi

Bengali
